Response Attachment 200-265

The RID Management Team does not agree that the proposed change(s) provide a valid clarification nor satisfy a system specification omission. The RID is therefore rejected. Thank you for reviewing the SLS and submitting your RID. Even though we rejected this RID, your input is valuable and we appreciate it.

Additional Information.

The term Test Set is defined in the Glossary to be a Group of CLCS RTPS Subsystems and Networks configured for a specific test, etc. A Launch Configuration Test Set is merely a Test Set that has been configured to support a launch.
